

Tumor Response Assessment Update 6/13/2019

Starting May 6th, 2019 tumor response assessments offered by CRIC and Radius can be ordered in Health Link using the new smart phrase “.TUMORRESPONSE”. Having an option to include tumor response assessments in Health Link has long been desired by UWCCC study team members to streamline access to the service. Using the smart phrase populates a report for CRIC and Radius staff that will be used as the tumor response assessment docket.

The Smart phrase should be entered in the order comments field of the respective imaging procedure(s) order (e.g. CT CAP) and will include the following:

- Study coordinator/nurse contact information
- UWCCC study number
- Subject ID, for screening cases where the subject ID has not been assigned, please label as “Screening”

The smart phrase will not interfere with other smart phrase information or other research related components entered into the comments of an order.

The smart phrase is a great step forward for CRIC and Radius to streamline our service offering. We will, however, continue to use the intake form in situations where the smart phrase cannot be used. The table below describes contexts of when the intake form will be used and when the smart phrase will be used. In short, the smart phrase can and should be used any time the study coordinator, study nurse, or study treating physician is placing the imaging procedure order which will require an assessment. The intake form will be used in contexts where health link orders can't be used or the order has already been placed, scheduled, and/or taken place.

Intake Form vs. Smart Phrase Use	
Intake Form	Smart Phrase - “.TUMORRESPONSE”
<ul style="list-style-type: none"> • Patient screening if scans procedure has already been ordered or occurred • Scans done outside of UWHC • Unscheduled time points 	<ul style="list-style-type: none"> • Any screening exam where the scans have yet to be scheduled • Any follow ups done at UW • Any imaging procedure ordered by a study team member

As we rollout this new ordering platform, the report will be run at the beginning of each business day. Report contents from the smart phrase can be updated hourly, however this is not a replacement for direct communication from study team members if there is an urgent update. Any urgent updates, information or requests should be sent to the CRIC Manager.
